

TEJ GOTI

Full Stack MERN Developer | Data Structures & Algorithms | 150+ LeetCode Problems

Surat, Gujarat, India 📍8160515463 | ✉️ gotitej2005@gmail.com | [in tejgoti](https://www.linkedin.com/in/tejgoti) | [tej789](https://github.com/tej789) | [Portfolio](#)

EXPERIENCE

- **Web Development Intern – Appifly Infotech** May 2025–June 2025
 - Developed and enhanced features for an e-commerce platform “**Social Tea Order System**”, enabling users to browse products, place tea orders, and manage purchases through an intuitive web interface.
 - Implemented responsive UI components and collaborated on backend API integration to support seamless order management.

EDUCATION

- **Charotar University of Science and Technology (CHARUSAT)** June 2023 – June 2027
B.Tech, Computer Engineering, CGPA:8.30 Anand,Gujarat

PROJECTS

- BlogNest** | [GitHub](#) July2024–October 2024
 - Built a dynamic and responsive front-end using React for a blog platform supporting two user roles: Authors and Readers. Implemented seamless user interfaces for blog creation, editing, and real-time viewing of published posts.
 - Technologies: React, HTML, CSS, JavaScript
- Local Crisis HelpChain** | [GitHub](#) | [LiveDemo](#) August2024–October 2024
 - Developed a full-stack MERN application enabling real-time crisis response coordination between victims, volunteers and NGOs with live geospatial mapping and automated request clustering.
 - Technologies: MongoDB, Express.js, React.js, Node.js, Socket.IO, Material-UI, JWT Authentication, JavaScript
- CarRental** | [GitHub](#) | [LiveDemo](#) June2025–October 2025
 - Built a full-stack MERN application enabling users to search, book, and manage car rentals with real-time availability verification, secure authentication, and separate dashboards for renters and car owners.
 - Technologies: MongoDB, Express.js, React.js, Node.js, JWT Authentication, Tailwind CSS, ImageKit, Bcrypt, JavaScript
- Talent-IQ** | [GitHub](#) October2025–Present
 - Built a full-stack MERN application enabling users to conduct technical interviews, collaborate on coding problems through video sessions, and evaluate candidates with real-time code execution in JavaScript/Python/Java, automated test case validation, and detailed performance analytics.
 - Technologies: MongoDB, Express.js, React.js, Node.js, JWT Authentication, Tailwind CSS, Clerk, Stream.io, Monaco Editor, JavaScript

CERTIFICATIONS & ACHIEVEMENTS

- **NPTEL - Data Structures and Algorithms using Java:** Indian Institute of Technology (IIT) | Jan-Apr, 2024
Secured an Elite Certificate with a score of 64%
- **NPTEL – Design and Analysis of Algorithm** Indian Institute of Technology (IIT) | Jan-Apr, 2025
- **LeetCode** - Solved 150+ Data Structures & Algorithms problems focusing on arrays, strings, stacks, Queue and Dynamic programming

SKILLS

- **Programming Languages:** Java, C++, JavaScript
- **Frontend Development:** React.js, HTML5, CSS3, TailwindCSS, Material-UI
- **Backend Development:** Node.js, Express.js, REST APIs
- **Authentication & Security:** JWT Authentication, Bcrypt
- **Databases:** MongoDB
- **Real-Time Technologies:** Socket.IO
- **Tools & Platforms:** Git, GitHub, VS Code, ImageKit, Clerk
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP)
